

Seminars and Workshops

Regularly KLIFOVET organises and offers Seminars and Workshops for interested scientists working in the animal health industry.

Find out about our Seminars and Workshops, having excellent and experienced speakers available. Our Conferences include a joint dinner and easy access to the experts. According to the participants, our GCP seminar is at least as good, many also scoring it as better than similar seminars offered by other organisations. And – the fees for our seminars are more than competitive.

For future events please contact us at seminar@klifovet.com or call at +49-89-5800820.

Here is the list of our successful organised events.
